Figure 3(a)

(351)

Initial price = cost to seller X (1 + x% profit margin)

(352)

Final price = y% of initial price

(353)

Price reduction
per unit period

=

$\frac{(\text{initial price} - \text{final price})}{\text{\# of unit periods in expiration period}}$

(354)

Adjusted initial price = initial price - ((price reduction per unit period) X (# of unit periods))

(355)
